Correction: Polyoxometalate based open-frameworks (POM-OFs)

Haralampos N. Miras,* Laia Vilà-Nadal and Leroy Cronin*

Due to an error during the production of the review article, Fig. 3 was duplicated as Fig. 8. The correct version of Fig. 8 is included below.

![Fig. 8](image)

Fig. 8 A highly-porous ionic crystal comprised of (a) the \([\text{Co}_2\text{Zn}_2\{\text{SiW}_{10}\}_2]\) sandwich POM anions, combined with (b) tetrabutylammonium (TBA) cations. \(^{55}\) (c) This structure contains spherical \(38 \times 38 \times 38 \text{ Å}^3\) cavities (indicated with blue spheres) in which the guest molecules are highly mobile and may be exchanged. All H atoms and solvent molecules are omitted for clarity.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
