

# Academic Skills

## A Long Thin Induction

### The Idea and Background

### The Pedagogy

Cohort 32 students  
Diagnostic Imaging  
and Radiography  
Level 1

#### Developing activities that scaffold student initiated learning

- Taking over 30 minutes of a regular lecture—to introduce note-taking as exam preparation
- Running Exam preparation workshop, which was completely student led
- Student centred activities <http://naddysheridan.wordpress.com/>

### The Student Voice

### So What?

Activities, discussions & sharing featured as favourites

Students asked for more hand-outs & vidcasts

Opt-out needs to be communicated better

Diverse abilities and expectations: impact of CfE in future?
