

adiposity
present for
LONGER &
LATER IN LIFE
in
progressively
more people
with one
condition

GREATER risks of 2nd, 3rd, subsequent comorbidities (& symptoms, e.g., pain, fatigue) due to:

- Metabolic
- o Physical
- Haemodynamic
- Inflammatory
- o Cellular, and
- Other impactsof excess adiposity

Solution

Target weight management much earlier in many chronic conditions + Upscale preventative policies
