“Annals of Public Health Issues” has come to stay!

We welcome you to *Annals of Public Health Issues (APHI)*. *Annals of Public Health Issues* is an international, open access, double-blind and peer-review journal. The journal aims to publish papers related to all aspects of public health research and practice, including health education, biostatistics, epidemiology, environmental health, community health, behavioral health, health economics, disability, reproductive and sexual health, occupational health, social work, medical sociology, mental health, (health-related) laws and public policy. *APHI* is owned by the Cephas Health Research Initiative Inc (Nigeria) – a private non-profit health organization established in 2016 by a group of professionals (researchers, academics, legal practitioners, and clinicians) in August 2016.

The journal serves a broad range of international audiences comprising students, trainees, and professionals in the field of public health. Hence, submissions from researchers of all cadres are welcomed, irrespective of their geographical location, race, creed, religion, or ideologies.

Only relevant and good quality papers written in English are considered for publication in *APHI*. Also, the only language for correspondence by the journal is English.

All papers submitted to *APHI* shall undergo rigorous peer review before an editorial decision is made. *APHI* publishes core research papers (original/review articles and study protocols) and other forms of papers (editorial, commentary, letter to editor, biography, quiz, experience, etc.). All submitted manuscripts shall also be subjected to similarity (plagiarism) checks.

The journal aims to publish accepted papers continuously in an open volume throughout the year. Hence, the publication process of accepted papers can be done rapidly, without delay.

We are looking forward to receiving your submissions because *APHI* has come to stay.

Thank you
